SUMMARY

A data-driven professional currently transitioning into Data Science, with expertise in control system modeling, Python, data visualization, business analytics, and MySQL. I leverage my multidisciplinary background to transform data into actionable insights and support strategic decision-making.

WORK EXPERIENCE

PT Bank Negara Indonesia

Corporate Secretary Officer

(Aug 2024 - Present)

- Conduct stakeholder satisfaction surveys to evaluate engagement effectiveness and identify improvement opportunities.
- Develop comprehensive stakeholder profiles and mapping to support strategic relationship management.
- Design and build interactive dashboards to analyze stakeholder data and support reporting and decision-making.
- Maintain and strengthen relationships with key stakeholders through engagement initiatives that enhance corporate reputation and trust.

SiteTran

Freelance Translator

(2023 - Present)

- Translate and localize full website content for international clients using SiteTran's web-based translation platform.
- Ensure accuracy, consistency, and cultural relevance across multilingual digital content.
- Support localization projects for global platforms such as **DistroKid**, enabling independent musicians to distribute music to major streaming services.

Booking.com

Freelance Translator

(2016 - 2024)

- Translate and localize property descriptions, attraction information, and web content for the global travel and hospitality platform.
- Ensure accuracy, consistency, and cultural relevance across multilingual content.
- Optimize translated content to improve clarity and user experience for international travelers.

PROJECT EXPERIENCE

Customer Churn Prediction (Machine Learning)

Developed a machine learning model to predict customers with high churn risk.

Key Contributions:

- Conducted **data preprocessing, feature engineering, and exploratory data analysis**.
- Built predictive models including **Logistic Regression and ensemble models**.
- Evaluated model performance using **PR-AUC, precision-recall, and cross-validation**.
- Identified **key drivers influencing customer churn**.

EDUCATION

Purwadhika Digital Technology School

(2025 - 2026)

Data Science & Machine Learning (Final score: 80,1)

- Applied Python, SQL, Machine Learning, and Tableau to perform data cleaning, analysis, visualization, and predictive modeling
- Built analytical solutions for bike-sharing demand prediction, customer segmentation using LRFM and demographic profiling, and customer churn prediction in the e-commerce industry using machine learning and data analytics techniques.

Institut Teknologi Bandung (ITB) Master of Business Administration (MBA), 3.96	(2023 - 2026)
Universitas Pendidikan Indonesia (UPI) Bachelor of Arts, 2.93	(2009 - 2015)

CERTIFICATION

Purwadhika Digital Technology School Data Science & Machine Learning	(2026)
--	---------------

SKILLS

Hardskills	Python Programming, SQL Database & Query, Data Wrangling, Data Visualization, Statistical Data Analysis, Machine Learning, Git & Github, Data Visual Studio Code, Translating
Softskills	Analytical Thinking, Problem Solving
Tools	Google Ads, Tableau, Python, Microsoft Excel
Language	Bahasa Indonesia (Native), English
